 MUSICbox
by PCM
MUSICbox Overview

MUSICbox is a music and messaging system that also doubles as an in-house marketing tool. MUSICbox can play up to 54 zones of music, advertise internal (or chain-wide) promotions and specials, and play recorded telephone messaging and music-on-hold...all from one system. With your MUSICbox, you can find any song within '3-clicks' and can choose to play a song once, or a thousand times....it's your choice.

The Music

Songs paint musical landscapes. It's about the quality of contact; how consumers experience the business and how your brand comes to life. Freedom of choice is power over your brand. MUSICbox, the most versatile system on the market, gives you on-demand access to the greatest music of all time and the newest hits of today!

Our passion is your freedom. Let our custom music selections liberate the essence of your brand.

Visit our website to see our full lineup of music categories and for a sample of our custom music packages and playlists.

Volume and Weather

All songs on MUSICbox are normalized so they play at the exact same volume levels; you'll never have to run to your amplifier again. What about the weather? Poor or adverse weather conditions can play havoc with digital satellite signals. With MUSICbox, the weather outside doesn't affect the ambiance inside; you're in power as long as there is power.

24-7 Support

PCM Technologies is here to help. We provide 24-7 Technical Support and warranty the hardware for the life of your initial contract. Want to get more out of your system? Our products come equipped with Video Tutorials and you can also participate in our free On-line Webinar Training Sessions.

MUSICbox Features

Sound Zoning

You can play Jazz in the restaurant, Classic Rock at the bar and Easy Listening for your Music on Hold... all at the same time. MUSICbox can play up to 54 simultaneous sound zones from one unit.

Auto Play Lists

MUSICbox can automatically create a play list for you based on your listening preferences. For example, choose the Top 100 hits from Retro, Rock and R&B between the years 1999-2005. You give it the parameters...MUSICbox will do the rest.

Advanced Scheduling

With our intuitive scheduling interface, you can control the type of music played at different times of the day (i.e. day-parting). For instance, based on the flow of your business, you can tell the system to play Light Jazz from 11am till 5pm, and have it automatically switch to Lounge from 5pm till closing...it's your choice.

Volume Scheduling

Volume Scheduling automatically enables MUSICbox to raise or lower the volume by time of day. Each sound zone has its own Volume Scheduler, so you can automate the volume levels across your entire location.

Promotions

Use your MUSICbox to market to your customers. The Promotions feature lets you play your own promotional content at a specific time or song interval. It's a fantastic tool that will keep your customers informed about your specials, new products and features...without compromising the integrity of your welcoming environment.

Completely Automated

Our systems can be completely automated. Everything from updating new music, to playing pre-programmed music for the next year; it's the easiest and most versatile system available.

Powerful User Management

With the flexibility of MUSICbox, you can restrict users from any of the features, songs and/or genres on the system. Rest assured that only approved music is played and the integrity of your business' ambiance is upheld. Even in your absence, you are in control.

Chain Management

A brand is only as strong as its consistent delivery of an unwavering message. With the Chain Manager, you can remotely manage unlimited MUSICboxes from a central (head office) location thereby controlling exactly what gets played throughout the 'franchise'. Develop a sound unique to your brand and ensure that it is played at all locations.

 MUSICbox HD
by PCM
MUSICbox HD Overview

Good things do come in small packages! PCM Technologies recognizes your needs and we create solutions that work for you. MUSICbox HD is an external USB Hard Drive that utilizes your existing computer to deliver your business music and messaging. Connecting to your PC through a simple USB connection...setup only takes minutes.

With all the same features and functionality of MUSICbox; it's a small, light, easy to install and cost effective alternative to our full system...if you have high speed internet and an existing PC with a sound card, MUSICbox HD is the perfect choice for you.

 VIDEObox
by PCM
VIDEObox Overview

Are you looking for a solution to augment the visual ambiance of your business? Whether you are interested in entertaining your patrons with music videos, or would like a cost-effective way to showcase corporate promotional video content, VIDEObox is the solution for you.

VIDEObox is the first on-demand music video delivery service that allows you to play your favourite music and music videos...when you want. VIDEObox has all the functionality of MUSICbox with the added feature of playing music videos and corporate videos on your TV's, Plasma's, LCD's or Projectors.

VIDEObox gives you access to thousands of hits and live concert performances. As well, VIDEObox can play videos in one area while playing music in others.

With VIDEObox you can have your own corporate TV network. Play your own corporate content where and when you want. All content can be controlled centrally from head office, locally on site, or a combination of the two. All content is distributed through high-speed download or monthly DVD updates.

SECURITYbox

The need for Digital Surveillance Systems is on the forefront of many companies' design plans.

SECURITYbox is a DVR (Digital Video Recorder) Surveillance system, offering remote monitoring cameras (via Internet), allowing you to record what is happening in your business 24x7. The presence of a DVR serves many purposes. In addition to the obvious benefits of a security system, SECURITYbox is the preferred tool in helping to maintain quality control (brand standards) and acts as a deterrent for employee misconduct.

You can have up to 16 cameras from one SECURITYbox and view all the cameras and playback (with audio) from anywhere in the world. PCM Technologies affords you the piece of mind in being able to access your business...even in your absence. Our CCTV camera surveillance systems consist of a variety of packages... each composed for your unique needs! Every business is different and the security needs of our customers vary from one to the next, so we customize each system to fit your security needs.

PCM Technologies is a holistic solution provider. As a premium solution, SECURITYbox can also be combined with MUSICbox or VIDEObox, to save space and money, while enhancing the complete ambiance of your business.

Who's in Control of your Brand?

It's about the quality of contact.
